Some tips for making an informed decision

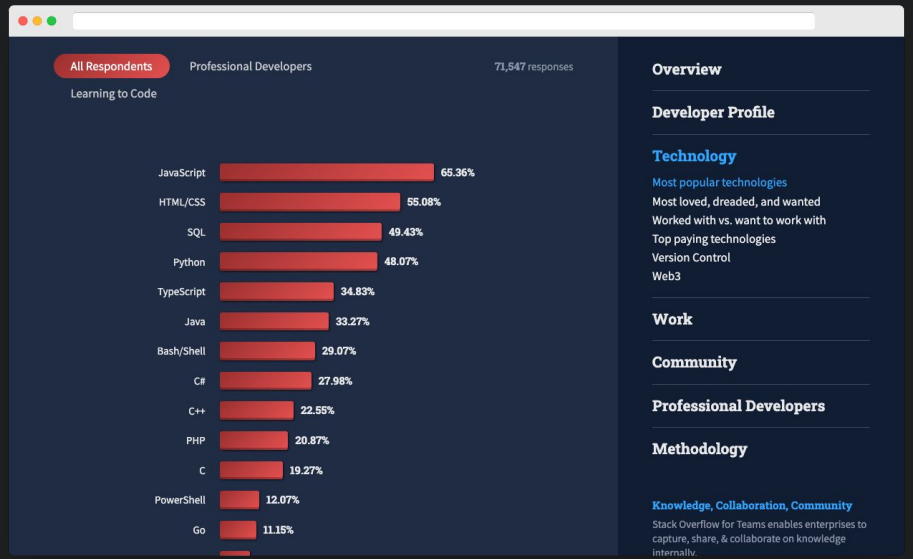

What do you want to learn?

What are companies using for the given position?

Check job ads, e.g., on indeed.com

What’s popular right now?

Check statistics on **survey.stackoverflow.co/2022**

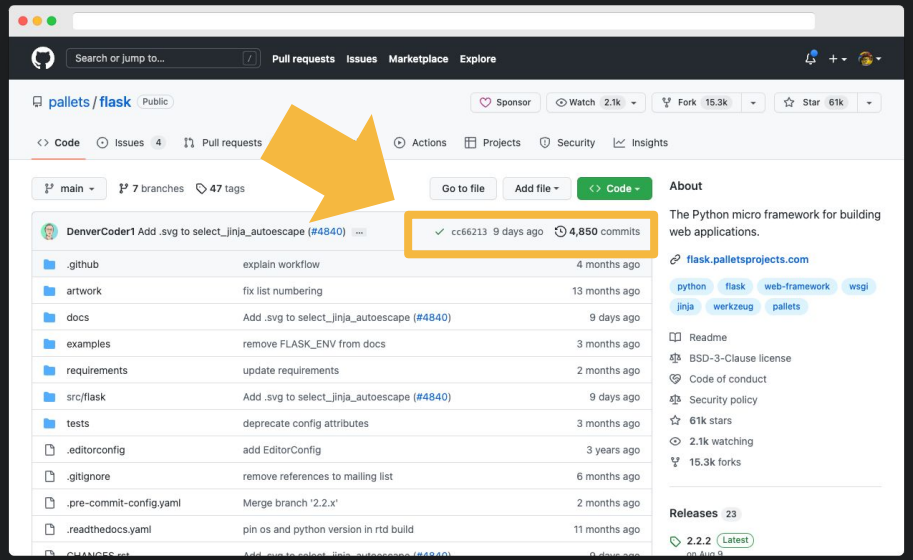

C<>DE

What’s popular right now?

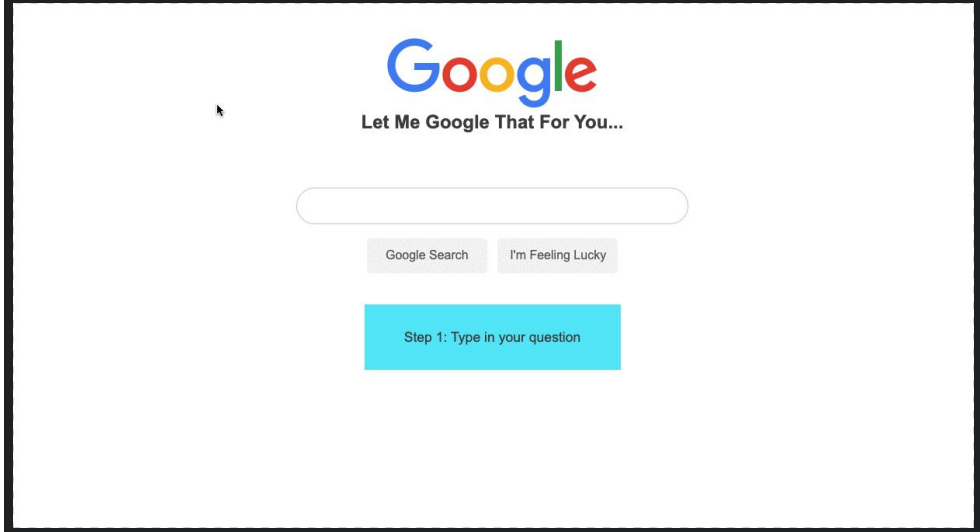

Check statistics on **ossinsight.io/2022**

Is your tool of choice (still) actively supported?

Check activity on **github.com**

Find out how others have built what you're building

Get feedback from others!

What about LLMs (large language models)?

Using an LLM* to learn Software Engineering

*Large Language Model (e.g., OpenAI ChatGPT or GitHub Copilot)

C<>DE

👍 Use it to explain complex topics in simpler terms.

👍 Use it to explain how code works.

👍 Use it to find or explain errors and bugs.

❗ Be conscious of privacy, copyright, and ethics!

❗ Don't blindly trust the answers!

❗ Always be transparent about your sources!

💡 You are accountable for what you publish or submit for an assessment.

💡 Always and repeatedly practice what you have learned from memory.

So, can I use ChatGPT to tell me the tools I should use?

You’re at a university to learn how to make independent decisions!

Don’t worry about making the wrong decision!

Don’t expect others to make the decision for you!

Task 1: What are project ideas?

Big Picture
What am I building?
Why am I building it?
What problem do I want to solve?
For whom do I want to solve it?

User Interfaces
Do I need multiple separate interfaces/apps?
How do users interact with my app?
Does it need to be fast, responsive, or are there any other UI requirements?

General Technology Needs
Hardware or software?
Online or offline?
Storing data online, offline or at all?

Specific Tools
What do you want to learn?
What are companies using?
What's popular?
Is it actively supported?
How are have others build a similar thing?

Task 2: Pick your tools (using tools like diagrams, wireframes, and user stories)
